

```
import java.util.*;

class Day2
{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        char ch = sc.next().charAt(0);
        if(Character.isLetter(ch)){
            System.out.print(ch+ ": Is an Alphabet");
        } else{
            System.out.println(ch + ": Is Not an Alphabet");
        }
    }
}
```
