

```
import java.util.*;

class Day9
{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        int n = sc.nextInt();

        int len = 0;

        while(n!=0){

            n=n/10;

            len++;

        }

        System.out.println(len);

    }
}
```
