```java
import java.util.*;
class Day14{
        public static int rev(int T){
        int res = 0;
        int rem = 0;
        while(T!=0){
        rem = T % 10;
        res = res*10+rem;
        T = T/10;
        }
return res;
}
        public static void main(String args[]){
        Scanner sc = new Scanner(System.in);
        int T = sc.nextInt();
        System.out.print(rev(T));
        }
}
```
